

Product Information

VicDisplay Guitar

PROFESSIONAL AUDIO

Description

VicDisplay Guitar is made with VicPET Wool and mostly produced from recycled plastic bottles. This material was engineered by Vicoustic for sound-absorption with enhanced acoustic performance especially over medium to high frequencies.

In addition, VicDisplay is presented with a holder support created to be used for a guitar, designed to be fixed to wall with screws.

Available in three colors, the Grey and the exquisite Torino Red, exclusive for this product, are made with VMT, whilst the Black is developed from black PET, with the additional value of having the sides also in black.

The VMT colors benefit from the Virtual Material Technology properties, being certified for Indoor Advantage™ Gold Building Materials by SCS Global Services, meeting indoor air quality standards, and OEKO Tex, meeting requirements for baby articles. It can also be printed with different colors and patterns, using dyeing technology for VMT.

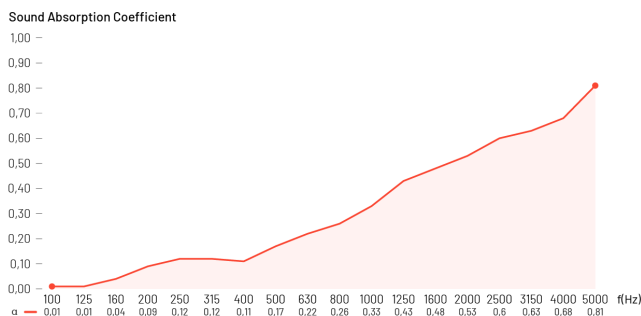

Note: Guitar not included.

Features
